Latin Name	Common Name	Sun	Water	Text Description
Acalypha wilkesiana 'Kilauea'		Full sun to part shade	Medium water	Native to the South Pacific. Can grow 3-6' tall & wide. Will require pruning if kept indoors, if put outdoors in the garden, frost will kill it. Water freely during active growth, but moderately in winter.
Aglaonema	Chinese evergreen	Part shade/Indirect light	Medium	Keep warm & moist. Do not like drafts; prefer warmth (no colder than 65 F).
Alternanthera bettzickiana 'Red carpet'	Calico Plant	Bright light	Medium; keep consistently moist but allow top 2 inches of soil to dry in winter	Native to moist, tropical areas. Can grow to 3' tall; indoor houseplant or planted outside in the summer as a ground cover (will spread 18-23"). To encourage bushing out, pinch top growth. To rejuvenate an older plant, cut down to 3-4" above soil level.
Amomum cardamomum	Cardamom	Part shade/Indirect light	Medium to high water (keep moist)	Prefers temperatures in 72-80 F range. Keep away from doors and windows to prevent drafts. Mist to provide enough humidity. Spring-Fall, water daily; Winter, water every other day.
Anthurium andreaeanum cultivar	Lavender tulip anthurium	Indirect light	Medium	Prefers temperatures in 70-90 F (cannot tolerate lower than 55 F). Keep moist, these plants prefer high humidity.
Bambusa sp.	Bamboo	Bright light	Medium	Prefers warm temperatures, does not like standing water. Mist regularly.

Latin Name	Common Name	Sun	Water	Text Description
<i>Bromeliad neoregalia</i>		Indirect light, moderate shade (can be acclimated to higher levels of gentle light, eastern morning exposure)	Keep water in the central cup but flush frequently to prevent bacteria & odors.	An air plant that relies on roots to anchor. Prefers temperature of 55 F and higher, can tolerate as low as 40 F. Do not repot mature plants. After it flowers, it will produce plantlets around the base of the mature plant. Plantlets will form their own roots & can be separated from the mother plant. This is best done when the plant let is about 1/3 the size of the mother plant. Pot plantlets into 4 - 6 inch pots.
<i>Bromeliad silvervase</i>		Indirect light, moderate shade (can be acclimated to higher levels of gentle light, eastern morning exposure)	Keep water in the central cup but flush frequently to prevent bacteria & odors.	Prefers temperatures of 59-70 F. Can take up to 5 years to flower but will produce a spectacular bright pink flowering bract. After it flowers, it will produce plantlets around the base of the mature plant. Plantlets will form their own roots & can be separated from the mother plant. This is best done when the plant let is about 1/3 the size of the mother plant. Pot plantlets into 4 - 6 inch pots.
<i>Costus sp.</i>		Part shade (morning light/east facing window)	Medium (keep moist)	Need warmth, do not tolerate frost.
<i>Croton</i>			Medium	Water only when soil is dry to the touch. Prefer high humidity (but do not like standing water) and warmth so keep away from drafts. Cannot tolerate temperature lower than 60 F.
<i>Encephalartos natalensis</i>	Cycad	Full Sun	Low water	Can tolerate cold to 25 F. Can grow 15 - 20 ft tall.
<i>Diffenbachia</i>		Low light (part shade)	Medium	Keep soil moist and mist to maintain humidity. Toxic to children & pets (due to high level of calcium oxylate).

Latin Name	Common Name	Sun	Water	Text Description
<i>Dracaena sp.</i>		Indirect light	Medium water (keep moderately moist).	Cannot tolerate temperatures under 50 F and grows best in potting soil.
<i>Ferns sp.</i>		Bright, filtered light (not direct)	Medium	Keep soil moist, do not allow to dry out, mist in the mornings to maintain humidity but do not allow to sit in water.
<i>Ficus benjamina</i>	weeping fig	Bright, indirect light	Medium	Water thoroughly but allow the soil to dry between waterings. Prune to shape and control size (can grow to 50-60 feet tall) .
<i>Geranium</i>		Full sun	Medium	Water thoroughly but allow the soil to dry between waterings. Snip off faded flowers to encourage new ones and trim stems by one third to encourage branching.
<i>Heliconia psittacorum</i>	Parrot's Beak	Bright light, direct sun	Medium	Preferred temperature range of 65-80 F; can tolerate night temperatures of 55 F. Member of the banana family. Can grow 3-4 feet. Blooms in Spring-Summer but requires bright light to bloom. Always keep moist, do not allow soil to dry out between waterings.
<i>Liriope</i>	Turf lily	Part shade to full sun	Medium	Water regularly; plant does not like to sit in water.

Latin Name	Common Name	Sun	Water	Text Description
<i>Murraya paniculata</i>	Orange Jasmine	Full sun	Medium (keep moist; but allow to dry slightly between waterings).	Tropical tree that can grow to 20' but also does well indoors as a container plant. With regular pruning, can be kept to 3'. Must have at least 6 hours of sun per day, best to keep in a south facing window in the winter.
<i>Papyrus</i>	Umbrella grass	Full sun to part shade	High	Prefers temperatures of 50-72 F.
<i>Philodendron scandens</i>	Heart Leaf Philodendron	Bright, indirect light (can tolerate medium to low light)	Medium (keep moist)	Prefers temperature of 66F - 75F. Inner sap is an irritant.
<i>Plectanthus</i>	Variegated Swedish Ivy	Part shade, filtered light.	Medium	Trim stems to encourage branching.
<i>Pothos sp.</i>		Indirect, filtered sunlight to low light	Medium, but allow to dry between waterings.	Vining plant, can grow 6 - 10' indoors.
<i>Pseuderanthemum</i>		Bright light	Medium, allow soil to dry out between waterings.	Trim branches to encourage bushiness.
<i>Spathiphyllum sp</i>	Peace lily	Bright, indirect light	Medium	Keep evenly moist, prefer well-drained soil and temperatures of at least 55 F.

Latin Name	Common Name	Sun	Water	Text Description
<i>Syngonium podophyllum</i>	Arrowhead Plant	Bright, indirect light	Medium	Prefers temperatures in 65-70 F range; will not tolerate temperatures below 40 F. Keep away from fireplaces & heat vents. Water when top of soil feels dry. Trailing habit makes it a good option for hanging baskets, but prune regularly to keep the middle full. *Produces sap that irritates skin.
<i>Tradescantia spathacea</i>	boat lily	Bright, indirect light	Medium (keep moist)	Dark-green, lance shaped leaves with purplish undersides make this a great houseplant. Can be moved outdoors for the summer but requires part shade.
<i>Tradescantia zebrina</i>	Silver Inch Plant	Part sun or bright light	Medium to high water	Vigorous vining growth, pinch sections back as needed, vines are easily re-rooted in soil.
<i>Trimezia martinicensis</i>	walking iris	Full to part shade	Medium	Produces bright yellow flowers year round. Not cold hardy, so best grown as an indoor plant in the Chicago area. Can take outdoors in the summer.
<i>Whitefieldia elongata</i>	White candles	Bright to mostly shade	Medium (prefers even moisture).	Will produce long, white flowers in spring and winter. Can grow to 4-6 feet tall, prune regularly to contain size. Does well in containers, prefers warm temperatures.
<i>Agave sp</i>		Full sun	Low water	Flowers only once by growing a tall center stem to produce flower (this can take 5 - 40 years). Repot every 2 years. *Inner sap is an irritant.
<i>Aloe sp</i>		Full to part sun	Low water	An easy to maintain house plant. Sunny conditions are needed for flowering, but aloe does fine with partial sun.
<i>Carniegeia gigantea</i>	Saguaro	Bright sun; south or west facing window.	Low water	Very slow growing but long-lived. Does not tolerate temperatures below 60 F.

Latin Name	Common Name	Sun	Water	Text Description
<i>Cleistocactus winterii</i>	Golden rat tail	Full sun	Low water	Branching cactus with a spreading, arching, trailing stem; can grow up to 40 inches long and 1 inch wide. Can produce salmon-pink flowers in spring and summer.
<i>Crassula ovata</i>	Jade	Full sun to part sun	Low water	An easy to maintain house plant for a sunny window but be careful to not overwater. Allow the pot to dry out between waterings and lessen watering for the winter months. Its branches are brittle, take care when moving the plant. Flower is white or pink.
<i>Echeveria sp</i>		Full sun	Low water	Can get sun burned in direct summer afternoon sun. Do not allow soil to stay continually moist between waterings, but if the leaves are not firm to the touch, your plant needs more regular watering.
<i>Euphorbia trigona</i>	African milk tree	Bright sun; south facing window is best, east and west facing windows will work.	Low water	A plant that does well in sunny, dry conditions. It thrives in well drained soils; allow soil to dry between waterings. Does not tolerate temperatures below 55 F. *Inner sap is an irritant.
<i>Euphorbia phosphorea</i>	Stick Euphorbia	Full sun	Low water	A moderately fast grower; does well indoors. The milky inner sap is said to become luminous when heated gently.
<i>Euphorbia pseudocactus</i>		Full sun	Low water	Small yellow flowers. Not to be confused with grandicornis. *Inner sap is an irritant.
<i>Gasteria sp.</i>		Part sun	Low water	White or yellow leaves can indicate too much sun. Does best with some light shade/ indirect sunlight. Slow growing.
<i>Haworthia sp</i>	Haworthia	Part sun	Low water	White or yellow leaves can indicate too much sun. Does best with some light shade/ indirect sunlight. Slow growing.
<i>Hoya australis</i>	Waxvine or waxflower	Part sun (east or west facing window)	Medium water; allow to dry between waterings.	Prefers temperatures above 60 F.

April 21 Members Only Pop Up Sale Houseplants, Cacti & Succulents

Latin Name	Common Name	Sun	Water	Text Description
<i>Hoya sp.</i>		Bright, indirect light	Medium	Water thoroughly but allow the soil to dry between waterings. Prefers warm temperatures and does not tolerate drafts.
<i>Hylocereus sp.</i>		Full sun to part shade	Low water; allow to dry between waterings.	Night blooming cactus.
<i>Kalanchoe bryophyllum</i>		Full to bright sun, south facing window	Medium water generally, low water in winter.	Blooms Sept. - Nov., small tubular flowers (white). Prefers warmth, no colder than 55.
<i>Ornithogolum caudatum</i>	Pregnant Onion	Full sun to part sun	Medium water	Not a true onion. White flowers. Larger bulbs become "pregnant" with pups which may be removed to grow a separate plant. Requires very good drainage between waterings. *Toxic if ingested.
<i>Sansevieria cylindrica</i>	Snake Plant	Full sun to part sun	Low to medium water	Prefers sun but will tolerate partial shade. Protect from afternoon hot sun. Water fairly often in the summer. Flower: branched usually greenish white, relatively long bloom. Preferred temp is 70 F, no lower than 40 F.
<i>Sedum sp.</i>		Full Sun	Medium water	Drought tolerant, not very demanding.
<i>Senecio crassissimus</i>		Bright light	Low to medium water; allow soil to dry between waterings.	Blooms in winter (bright yellow daisy flowers).
<i>Senecio cylindricus</i>		Bright light	Low water	Low growing succulent shrub. Can grow up to 24 inches tall and spread up to 5 feet. Can grow as a container plant but will benefit from spending the summer outdoors. Move back indoors before the first frost.
