

Helianthus annuus SUNFLOWER

Every part of
the Sunflower
is edible!
petals, seeds,
leaves,
stalks,
and roots

Sunflower
plants absorb
toxins and radiation
from the soil

Sunflowers are
native to southern
Canada, northern
Mexico, and central
and western USA

Helianthus annuus SUNFLOWER

Sunflowers are
usually yellow
but they
also come
in red,
orange,
and
purple!

They represent
happiness, loyalty,
and longevity.

Is the state
flower of
Kansas
